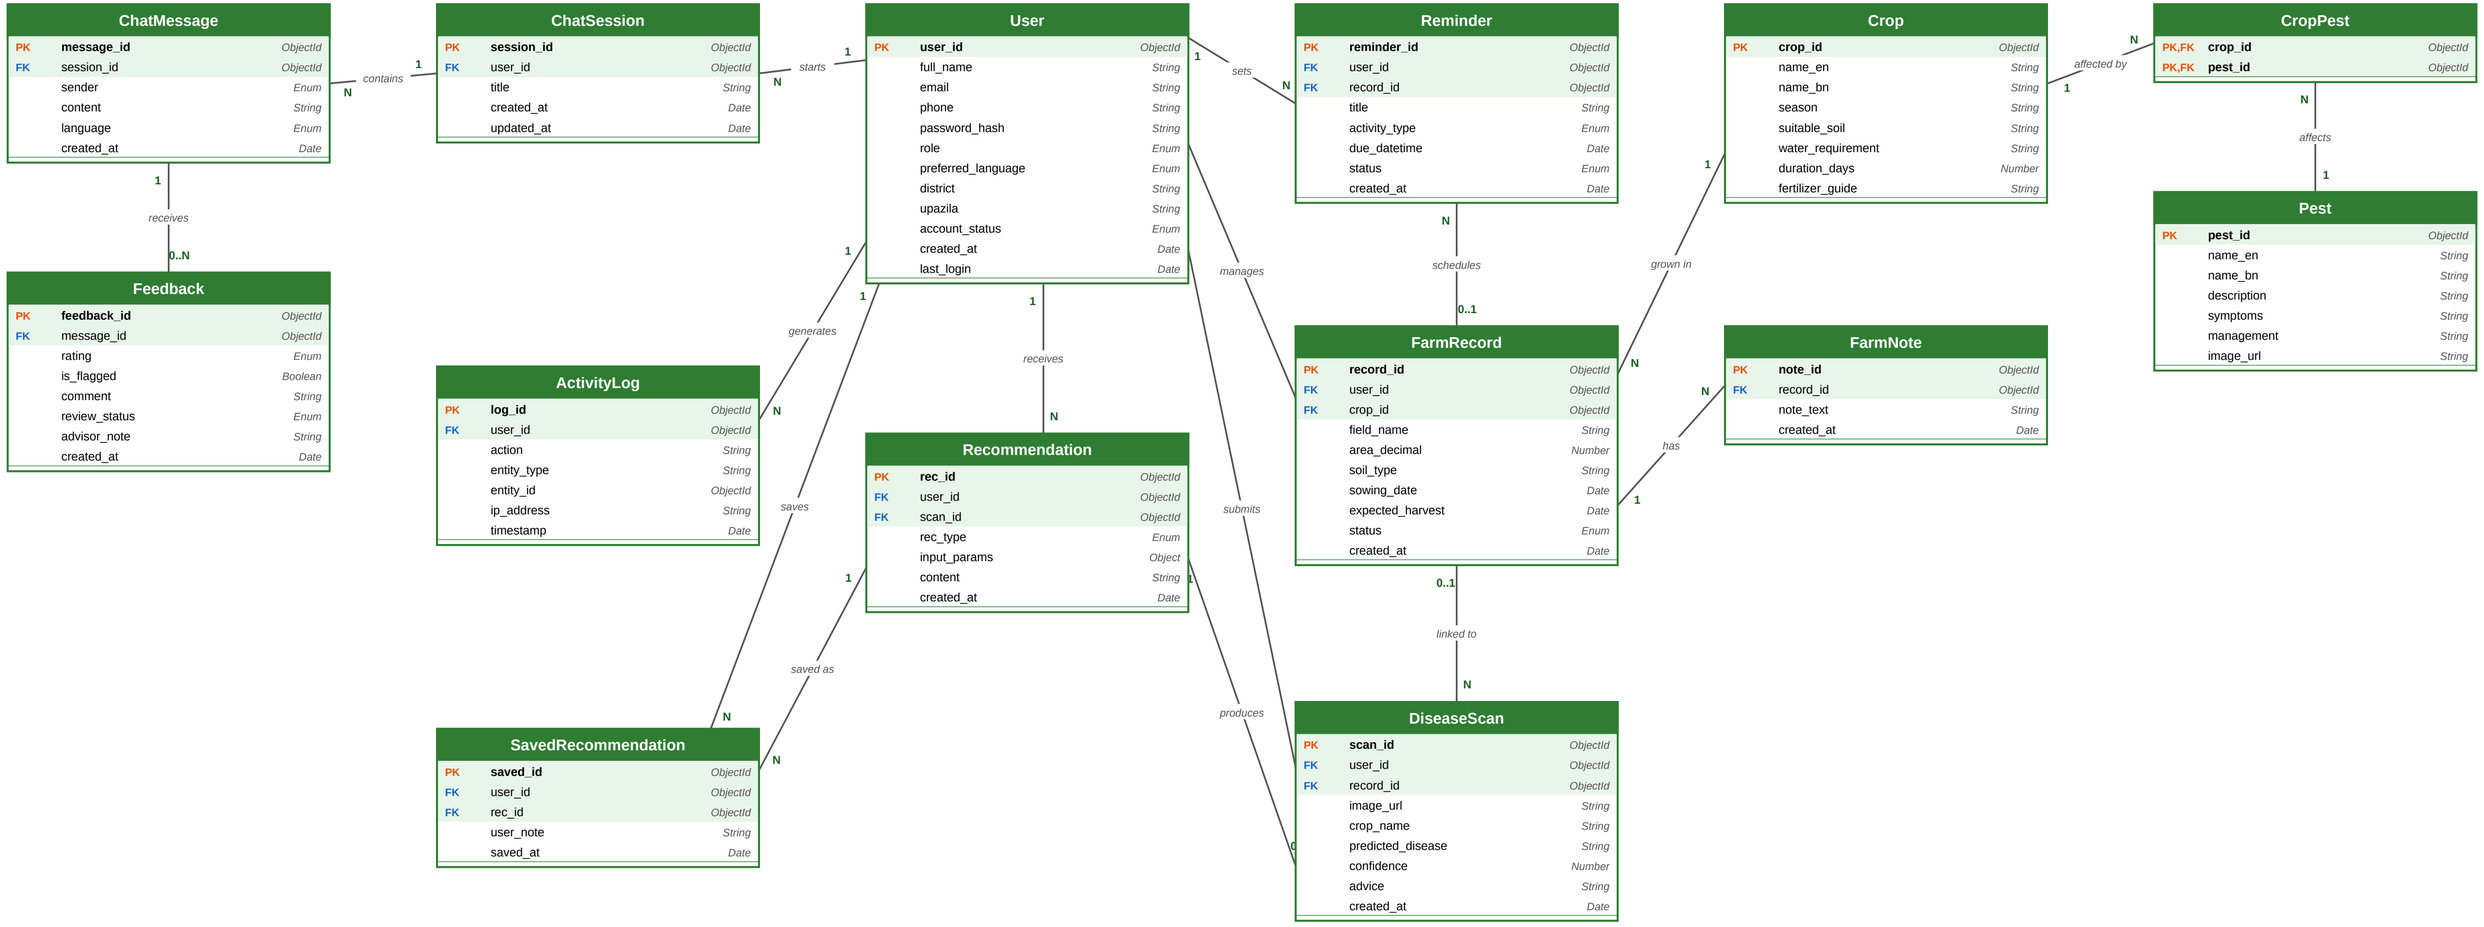
KrishiBondhu AI - Entity Relationship (ER) Diagram

Database entities, relationships, primary keys (PK) and foreign keys (FK) | Implemented as MongoDB collections | Team CSE4104-7G-T03



Legend PK = primary key (_id) FK = foreign key (reference to another collection's _id) 1 = exactly one N = many 0..1 = optional one 0..N = optional many

Crop - Pest is a many-to-many relationship resolved by the CropPest junction (composite PK). Feedback.review_status tracks advisor review of flagged responses (the reviewer is recorded in ActivityLog).
